

1. Analyze my entire code base for selenium java (Feature file, Page class, feature + Page class)

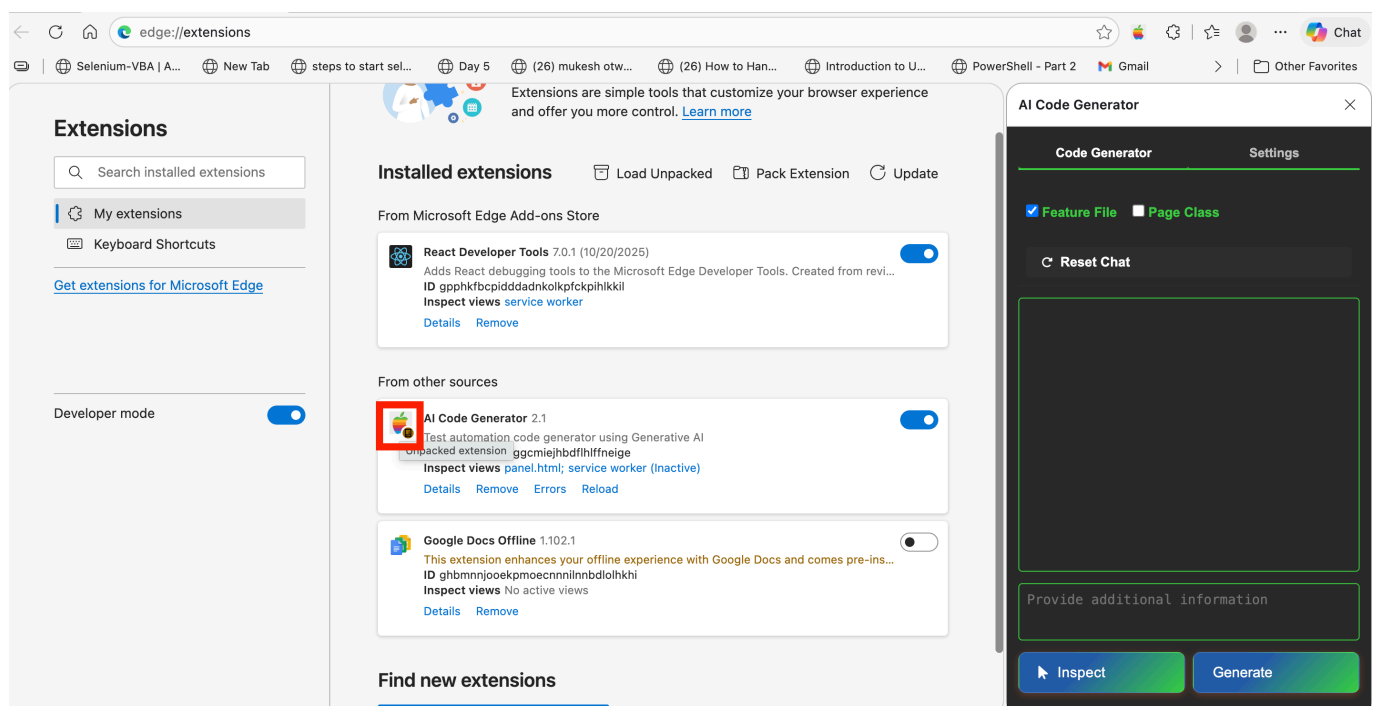

GO STEP BY STEP ONCE UPON MY APPROVAL PROCEED WITH NEXT STEPS

--Give me the files in which implementation is done --Proceed with Playwright Typescript implementation

=> Please review ai-extension project as it is now migrated to Playwright and Typescript framework.

2. Classwork : Updated the Logo PFB screenshot

The screenshot displays the Testleaf CRM/SFA application interface. The main window shows the 'Create Lead' form, which is divided into several sections: 'Company Information', 'Contact Information', and 'Primary Address'. The 'Company Information' section includes fields for Company Name, First Name, Last Name, Source, Marketing Campaign, First Name (Local), Last Name (Local), Birth Date, Department, Annual Revenue, Preferred Currency, Industry, Number Of Employees, Ownership, SIC Code, Ticker Symbol, Description, and Important Note. The 'Contact Information' section includes fields for Country Code, Area Code, Phone Number, Extension, Person to Ask For, E-Mail Address, and Web Url. The 'Primary Address' section is partially visible at the bottom.

On the right side, there is an 'AI Code Generator' sidebar. It has a 'Reset Chat' button and a 'Feature File' tab selected. The sidebar contains a scenario outline and examples for the 'Create Lead - Company Name' feature.

Scenario Outline: Enter a valid Souf
Given I am on the Create Lead page
When I type "<companyName>" into the Company Name field
Then the Company Name field should be populated

Examples:

- companyName
- "Mysore Silk Ltd"
- "Coimbatore Textiles Pvt Ltd"
- "Chennai IT Solutions"
- "Bangalore BioTech Industries"
- "Hyderabad Pharma Enterprises"

The sidebar also includes a 'Copy' button and a 'Provide additional information' input field.
